

# Comprehensive Compliance, Cybersecurity, & Managed IT for the DIB

## SENTINEL BLUE SHIELD

Defense contractors are under growing pressure to maintain and document resilient IT operations, even when they lack the resources of a large enterprise. Sentinel Blue Shield delivers an end-to-end enterprise-grade cybersecurity and IT solution purpose-built for CMMC Level 2.

### Your Complete CMMC Environment in 90 Days

As Sentinel Blue's cornerstone solution, Shield combines Citadel, Vanguard, Pathfinder, and Overwatch into a unified offering that delivers technology, governance, monitoring, documentation, and operational support. Shield provides a fully integrated environment where systems and processes are designed to work together to meet defense industry requirements from day one. Many organizations can use Shield to prepare for CMMC assessment in an average of 90 days.

### Flexible Implementations to Fit Your Environment

For organizations with limited CUI workflows, Shield can be deployed as a secure enclave using isolated workstations or virtual desktop infrastructure dedicated to CUI processing. For organizations where CUI handling extends across the broader business, Shield supports full enterprise implementations designed for more complex environments, including manufacturing and other organizations with hybrid on-premises infrastructure.

Whether greenfield or inherited from another provider, the resulting IT environment will deliver the technology, governance, monitoring, and documentation necessary for CMMC Level 2 and other regulatory frameworks.

## SHIELD at a Glance

- CMMC solutions designed to be assessment-ready in as little as 90 days
- Cybersecurity for federal contractors
- Managed IT fully integrated with your enclave or enterprise environment
- Purpose-built for the Defense Industrial Base

## We've Done the Legwork

We created Shield specifically for defense contractors and highly regulated organizations handling CUI. Every component of the platform, from the tech stack to the policy framework, was designed to align with CMMC.

Our fully managed approach combines carefully vetted cybersecurity technologies with mature operational processes and hands-on expertise from experienced DIB professionals. We've done the work of building compliant architectures, developing documentation frameworks, and establishing best practices for security, scalability, and long-term growth.

## SHIELD: FULLY MANAGED CYBERSECURITY & IT SERVICES

- Enterprise-grade cybersecurity administration, hardening, monitoring, and operational oversight.
- Modern endpoint protection and response capabilities designed to defend against advanced threats and ransomware activity.
- Continuous monitoring, threat detection, investigation, and response through Overwatch, Sentinel Blue's SOC-as-a-Service.
- Ongoing vulnerability scanning, prioritization, and remediation guidance to reduce organizational risk exposure.
- Structured incident response support and executive cybersecurity advisory services.
- Secure email management, phishing protection, and monitoring against email-based threats and business email compromise.
- Identity and authentication management, MFA administration, and authentication controls aligned to compliance requirements.
- Backup and disaster recovery designed to protect critical systems and support recovery.
- Secure network administration, configuration management, and infrastructure support.
- Third-party vendor management, coordination, and support.
- Day-to-day IT support services that help end users remain productive and secure.
- Access to experienced engineers for architecture, escalations, optimization, and technical guidance.
- Policies, procedures, SSP development, POA&M management, and compliance documentation aligned to implemented controls.

### About Sentinel Blue

Sentinel Blue is a CMMC leader and managed security service provider bringing the power of enterprise cybersecurity tools to federal contractors of all sizes. Specializing in emerging technologies and digital transformation, Sentinel Blue offers comprehensive, scalable, end-to-end cybersecurity solutions for clients and partners within the defense industrial base (DIB) and other highly regulated industries.
